

## **Nanotech Surface Solutions™ Window Care**

### Product Information

#### **Description**

- Clear nano-based protective coating for windows and crystal-based surfaces which creates water repelling characteristics and prevents liquids and dirt to adhere to the surface.
- The non-adhesive surface can be cleaned easier and reduces the build-up of dirt, grime and chalk deposits.

#### **Suitable Substrates**

- Windows
- Crystal Doors
- Skylights
- Solar Panels

#### **Other Data**

- Spread rate: 5 ml/ square meter
- The drying time: 2 hours but maximum protection reached after 24 hours
- Re-coat interval: Does not apply
- Application temperature: 5- 30°C.
- Shelf Life: 24 months in unopened container.

#### **Application**

- Clean the surface very well prior to the product's application. Alcohol should be used to remove all types of contaminants.
- Shake the spray bottle vigorously to make sure its contents are mixed thoroughly.
- Spray a small quantity of the sealant to a soft microfiber cloth or pad and wipe it on the glass evenly using a circular motion.
- If you're able to see light gray veils on the surface make sure to keep rubbing the coating until they are gone.
- Surface will be touch-dry after 1 hour and completely chemically resilient after 24 hours. Cleaning the surfaces should be performed with water and a cloth.
